

## Daily blood pressure monitoring – an important step in watching your health

**High blood pressure is the No.1 modifiable risk factor for stroke**

Common risk factors, such as stress, being overweight, smoking, diabetes or hereditary disposition, cause a pathological rise in the systolic pressure (when the heart contracts) and diastolic pressure (when the heart dilates).

**High blood pressure often goes unnoticed because there are usually no symptoms**

This is precisely the reason why regular self-monitoring is so important. It enables you to take preventive action, or to see the effect of any medical treatment you are receiving.

**Prevention and treatment are essential**

A change in diet, losing weight, quitting smoking or a programme of regular exercise can help. All further treatment for high blood pressure is, of course, a matter for your doctor.

According to the blood pressure classification by the WHO/ISH\* (revised in 1999)

## Clinically validated measuring accuracy

The accuracy of the algorithm used in the Omron 705IT blood pressure monitor has been proven according to the BHS protocol. In this respect Omron meets the highest medical requirements to assure long-lasting, reliable use.

The Omron 705IT operates quietly, is easy to use and easy to apply. It comes with a medium size cuff that fits upper arm size 22 – 32 cm. For accurate readings we strongly recommend the use of a proper sized cuff; therefore small or large cuffs are optionally available.

All your information at a glance!

## Transmit your blood pressure values to computer and/or doctor

More and more people are measuring blood pressure at home, most of them store and share their readings with their doctor for efficient treatment, now Omron makes this process even easier. The Bio-Information (BI) connection makes it easy for you to transfer data to your PC. Just connect the 705IT blood pressure monitor to your computer using the supplied USB cable and connection software. A dedicated, compact USB printer with data and graphical output is optionally available.

The software and the data output of this device are compatible with most PC's having the more recent versions of MS Windows® installed. The data can be easily manipulated in a program like MS Excel®.

An universal connection to PC and printer

OMRON latest advanced measurement technology

The World Hypertension League recommends regular blood pressure monitoring with clinically validated devices.

Monitoring your measurements is easy, thanks to the large operation buttons and the large easy-to-read display. The memory facility for 28 measurements (your twice-daily measurements for two weeks) helps you to monitor vital changes in your blood pressure. Date and time are shown.

A storage case is supplied to protect your monitor. Using an optional mains adapter makes the unit suitable for permanent use and saves on battery consumption.
